

TOMÁS IGNACIO NADAL

CABA, Argentina | tomasnadal04@gmail.com | linkedin.com/in/tomasnadal | tomasnadal.netlify.app

PROFESSIONAL SUMMARY

3rd-year Data Science student at UNSAM and Tech Entrepreneur. I combine a strong statistical and mathematical foundation with extensive software engineering expertise. Founder of Zevetix and Co-founder of Nexium Solutions, where I developed sharp product vision and team leadership skills. Specialized in transforming data into strategic solutions: from analytical modeling and machine learning, to deploying them into scalable digital platforms powered by Artificial Intelligence.

EDUCATION

B.S. in Data Science — *Universidad de San Martín (UNSAM)* 2023 – Present

Buenos Aires, Argentina (Currently in 3rd year)

- Rigorous theoretical background focusing on probabilistic statistics, linear algebra, calculus, and mathematical modeling.
- Scientific programming (Python, R) for data analysis, visualization, and Machine Learning algorithm development.
- Cultivation of scientific rigor for hypothesis validation and empirical data-driven decision-making.

WORK EXPERIENCE

Founder & AI/Data Consultant — *Zevetix* 2025 – Present

Buenos Aires, Argentina (Remote)

- Founded and manage a consulting firm focused on intelligent automation, data analysis, and product development.
- Lead product discovery processes, translating complex business challenges into data-driven and AI solutions.
- Design and integrate Large Language Model (LLM) agents (OpenAI, Anthropic), significantly optimizing operational workflows.
- Exercise technical leadership and strategic vision, managing stakeholder relationships and prioritizing key performance indicators (KPIs).

Co-Founder & Chief Technology Officer — *Nexium Solutions* 2022 – 2026

Buenos Aires, Argentina (Remote)

- Led the end-to-end development and delivery of **over 100 high-performance digital projects**.
- Developed advanced skills in **agile team management**, coordinating multidisciplinary departments (development, design, data).
- Directed the complete product lifecycle across multiple products, applying Scrum methodologies to accelerate delivery times by 30%.
- Designed scalable architectures that currently serve as robust foundations for integrating data analytics pipelines in e-commerce and corporate platforms.

Software Developer (Freelance) 2020 – 2022

Buenos Aires, Argentina (Remote)

- Began my career building robust systems focused on performance and accessibility, skills that enable me today to deploy analytical models into production efficiently.

SKILLS

Data Science & AI: Python, Pandas, SQL, R, Applied Statistics, Machine Learning, LLM Integration (Prompt Engineering).

Development & Deployment: Next.js, React, Node.js, JavaScript, TypeScript, Tailwind CSS, Git / GitHub.

Soft Skills & Product: Team Leadership, Agile Project Management (Scrum), Strategic Vision, Assertive Communication, Product Management.

Languages: Spanish (Native) | English (Advanced - Cambridge CAE C1 / FCE B2).

CERTIFICATIONS

Python (Front-end / Back-end) — *Codo a Codo (Ministry of Education)* Certification

React JS (Top 10) — *Coderhouse* Certification
